Section 1: Product and Company Identification

PRODUCT NAME: Boron Nitride Products  
CHEMICAL NAME: BN  
MANUFACTURER: Materion Brewster LLC.  
PO Box 1950  
Brewster, NY 10509-8950  
EMERGENCY TELEPHONE: 845-279-0900  
CHEMTREC 800-424-9300 (24 hour)

Section 2: Composition/Ingredients

* All concentrations are in milligram per cubic meter of air (mg/m3)

Section 3: Hazard Identification

EMERGENCY OVERVIEW:  
The material as sold in solid form are generally not considered hazardous. However, if the process involves grinding, melting, cutting or any other process that causes a release of dust or fumes, hazardous levels of airborne particulates could be generated.

PRIMARY ROUTES OF ENTRY: Inhalation, Skin contact.

TARGET ORGANS: Respiratory tract; Skin

HUMAN EFFECTS AND SYMPTOMS OF OVEREXPOSURE:  
Listed below are certain potential health hazards, which apply to the hazardous ingredients, found in the subject material.

BORON  
Skin : Irritating to skin and mucous membranes

Eye: Could be irritating to the eyes

Inhalation; Inhalation of boron compounds may cause pulmonary granulomas and emphysema

Chronic: Exposure can lead to degeneration of the liver and kidney. Boron affects the central nervous system Boron poisoning causes depression to the circulation, persistent vomiting and diarrhea, followed by shock and coma

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE:  
Individuals who may have had allergic reactions to metals or sensitivity, may encounter skin rash or dermatitis, if skin contact with this product occurs.Persons with impaired pulmonary functions, may incur further impairment if dust or fumes are inhaled
CARCINOGENIC REFERENCES:
No classification data on carcinogenic properties of this material is available from IARC, NTP, ACGIH or OSHA

Section 4: First Aid Measures

FIRST AID FOR EYES: Dust or powder should be flushed from the eyes with running water for 15 minutes. If irritation persists obtain medical assistance.

FIRST AID FOR SKIN: Skin cuts and abrasions can be treated by standard first aid. Skin contamination with dust or powder can be removed with soap and water. If irritation persists obtain medical assistance.

FIRST AID FOR INGESTION: Obtain medical assistance at once.

FIRST AID FOR INHALATION: Breathing difficulty, caused by inhalation of dust or fume requires removal to fresh air. If breathing has stopped perform artificial respiration and seek medical assistance at once.

Section 5: Fire Fighting Measures

FLASH POINT: Non-flammable as a solid

EXTINGUISHING MEDIA: This material is non-combustible, for surrounding fires use appropriate extinguishing agent. Do not use water to extinguish fires around operations involving molten metal, due to the potential for steam explosion.

SPECIAL FIRE FIGHTING PROCEDURES: Self-contained breathing apparatus should be worn when fighting metal dust fires. High levels of dust or fine particles in the air may ignite or explode.

Section 6: Accidental Release Measures

SPILL OR LEAK PROCEDURES: In solid form this material poses no special clean-up problems. Use normal clean up procedures; wet sweeping or HEPA vacuum, for clean up of dust or powder. Do not use compressed air for cleaning.

Section 7: Storage and Handling

In solid form this material poses no special problems. Store metal in a dry area. Do not store adjacent to acids.

Section 8: Exposure Control/Personal Protection

EYE PROTECTION REQUIREMENTS: Safety glasses are recommended.

SKIN PROTECTION REQUIREMENTS: Protective gloves are recommended, to prevent mechanical irritation.

RESPIRATORY PROTECTION:
respirator Not normally required. Use an appropriate NIOSH approved
if airborne dust concentration exceed the OSHA, PEL or ACGIH, TLV

OTHER PROTECTIVE EQUIPMENT: Eye wash fountain should be readily available in areas of use or handling.
EXPOSURE LIMITS: Not established for product as whole. Refer to Section 2.

VENTILATION REQUIREMENTS:
LOCAL EXHAUST: Recommended, when cutting, grinding or melting or any other operation where dust or fumes are created
GENERAL: Recommended

ENVIRONMENTAL SURVEILLANCE: If the operation generates dust or fumes, exposure to airborne materials should be determined by having air samples taken in the employees breathing zone and work area.

---

**Section 9: Physical and Chemical Properties**

- **PHYSICAL FORM:** Solid metal
- **COLOR:** White
- **ODOR:** None
- **MELT POINT:** 2700°C
- **SOLUBILITY IN WATER:** Insoluble
- **SPECIFIC GRAVITY:** N/A
- **VOLATILE BY WEIGHT:** Essentially zero
- **VAPOR PRESSURE:** N/A
- **DENSITY:** 2.25 g/cm³

---

**Section 10: Reactivity**

- **STABILITY:** This is a stable material.
- **HAZARDOUS POLYMERIZATION:** Will not occur.
- **INCOMPATIBILITIES:** Acids and Strong Oxidizers, water/moisture
- **DECOMPOSITION PRODUCTS:** None under proper usage conditions.
- **CONDITIONS TO AVOID:** Conditions which create dust or fumes.

---

**Section 11: Toxicological Information**

There is no information on the toxicity of this alloy. Under normal use of the solid form of this material there are few health hazards. Welding, cutting grinding or any process creating dust, fume or oxide may cause hazardous levels of certain elements, as addressed in Section 2.

---

**Section 12: Ecological Information**

In solid form this material poses no special environmental problems. Metal powder or dust may have significant impact on air and water quality. Emissions, spills and releases to the environment should be controlled immediately.

---

**Section 13: Disposal Considerations**

Because of its high intrinsic value this material should be reclaimed. Dispose of in accordance with all applicable Federal, State and Local Regulations.

---

**Section 14: Transportation Information**

- **D.O.T. SHIPPING NAME:** Not regulated
- **D.O.T. HAZARD CLASS:** None
- **PRODUCT RQ:** None
- **TECHNICAL SHIPPING NAME:** Metal Alloy
- **UN/NA NUMBER:** None
- **IATA, Dangerous Goods Regulations:** Not Regulated, in solid form
Section 15: Regulatory Information

OSHA STATUS:

TSCA STATUS:
These products are a mixture. Components of these products are listed on the TSCA Chemical Substance Inventory of Existing Chemical Substances.

RCRA STATUS: Not regulated, in solid form

SARA TITLE III:
The constituents of this alloy contain hazardous substances, above one(1) percent, and are subject to the reporting requirements under SARA Title III Section 313.
